under Article 35 and transmitted to the applicant according to Article 36.	lv						
2. This REPORT consists of a total of 5 sheets, including this cover sheet.							
3. This report is also accompanied by ANNEXES, comprising:							
a. (sent to the applicant and to the International Bureau) a total of sheets, as follows:							
a. (sent to the applicant and to the International Bureau) a total of sheets, as follows: sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or							
sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).							
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental							
Box.							
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s))							
, containing a sequence listing and/or tables							
related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).							
4. This report contains indications relating to the following items:							
Box No. I Basis of the report							
Box No. II Priority							
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability							
=							
Roy No. IV Look of unity of investion							
Box No. IV Lack of unity of invention Reasoned statement under Article 35(2) with regard to povelty, inventive step or industrial applicabilities.							
Box No. IV Lack of unity of invention Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement							
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;							
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement							
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement Box No. VI Certain documents cited							
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement Box No. VI Certain documents cited Box No. VII Certain defects in the international application Box No. VIII Certain observations on the international application

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/008505

Box			tide 35(2) with regard to novelty, inventive step or industrial applicability; porting such statement	
1.	Statement			
	Novelty (N)	Claims	2-22, 24	YES
		Claims	1, 23	_ NO
	Inventive step (IS)	Claims	3	YES
		Claims	2, 4-22, 24	NO
	Industrial applicability (IA)	Claims	1-24	YES
		Claims		_ NO

2. Citations and explanations (Rule 70.7)

This report makes reference to the following document:

D1: DE 11 58 690 B (KLOECKNER HUMBOLDT DEUTZ AG)
5 December 1963 (1963-12-05)

- 2 INDEPENDENT CLAIMS 1 AND 23
- 2.1 The present application does not meet the requirements of PCT Article 33(1) because the subject matter of claim 1 lacks novelty (PCT Article 33(2)).

Document D1 discloses (the references between parentheses refer to that document):

sliding door (1) with a guide (61, 57, 62) for a door leaf that can be moved between an open position and a closed position within the guide (61, 57, 62), with a locking device, which locks the door leaf in the closed position by means of fictional engagement (see figure 8), the locking device comprising drive means (54), force-

International application No.
PCT/EP2004/008505

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

transmitting means (51) that interact with the drive means (54), locking elements (25) and motion translators (50) that move the locking elements (25), the locking elements (25) being moved from a release position in which the door leaf is released into a retaining position in which the door leaf (14) is held by frictional engagement, a frame (62) being provided which covers at least part of the edge region of the first side (3, 12) of the door leaf when the door leaf is in the closed position, and the motion translator (50), using the force transmitting means (51) and the drive means (54), moving the locking elements (25)in a first circumferential direction relative to the frame (12) parallel to a side of the door leaf perpendicularly from the release position into the retaining position and in the other circumferential direction from the retaining position into the release position.

- 2.2 In addition, in D1 the sliding door is used as a safety door (see D1, column 1, lines 21-29), and therefore the use claim also lacks novelty.
- 3 DEPENDENT CLAIMS 2, 4-22, 24

Claims 2, 3-22 and 24 do not appear to contain any features which, in combination with the features of any claim to which they refer, meet the PCT requirements for novelty and inventive step.

International application No.
PCT/EP2004/008505

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

4 DEPENDENT CLAIM 3

The subject matter of claim 3 differs from document D1 in that the locking elements are arranged in a second frame part that is associated with the second side of the door leaf.

The present invention can therefore be considered to address the problem of making the door leaf of the sliding door known from D1 considerably more simple.

Claim 3 of the present application proposes solving the problem by accommodating the locking elements in a frame part. That solution is not obvious and would require a step which a person skilled in the art could not implement without any indication in the prior art. Claim 3 thus meets the PCT requirements for novelty and inventive step (PCT Article 33).
